

Edgar Petrosyan

Senior Frontend Developer

PROFILE

Senior Frontend Developer with 8+ years of hands-on experience architecting scalable, high-quality web applications using React, Next.js, Angular, and TypeScript. Specialized in building complex admin panels, dashboards, real-time features, and performance-critical user experiences. Proven ability to own features end-to-end, modernize legacy codebases, implement clean & maintainable architectures, and collaborate effectively with product, design, and backend teams to deliver intuitive, production-grade solutions in fast-paced environments.

Phone: +374 94 28 82 31

Email: edgarpetrosyanak@gmail.com

Location: Yerevan, Armenia

LinkedIn: linkedin.com/in/edgarpetrosyan

GitHub: github.com/edgarpetrosyan0

SKILLS

Core: JavaScript (ES6+), TypeScript,

HTML5, CSS3/SCSS

Frameworks & Libraries : Angular, ReactJS, Next.js, Knockout.js

State Management : NgRx, RxJS, Redux, Redux Toolkit, React Query, Angular Signals

UI & Styling: Bootstrap, Tailwind CSS, Ant Design, Shadcn UI, Kendo UI, Material UI, PrimeNG, Angular Material

API & Communication: REST/RESTful APIs, WebSockets GraphQL, HTTP/HTTPS Authentication JWT, OAuth 2.0

Quality & Optimization: Web Accessibility, Browser APIs, Web Performance Optimization, SEO

Testing: Jest/Jasmine, Cypress, Playwright, React Testing Library

AI-Assisted Development: Claude / Claude Code, Cursor, OpenAI Codex

Tools: Git/GitHub, Swagger, Postman, Jira, Azure DevOps, Vite, Webpack, Figma,

CAREER SUMMARY

Frontend Engineer

Ideascoll April 2025 – Present

- Architected visually polished, highly responsive admin panels and landing pages with React 19, Next.js 15+, TypeScript, Tailwind CSS, Ant Design and Shadcn UI
- Designed and implemented predictable, scalable state management using Redux Toolkit, significantly improving data consistency and developer experience
- Optimized rendering patterns and component structure for superior performance and long-term maintainability in production
- Collaborated closely with designers and backend engineers to deliver consistent design systems and seamless API integrations

Software Developer (Consultant) | Freelance

February 2024 – April 2025

- Led end-to-end development of multiple web applications using Angular 18+, React / Next.js, RxJS and Redux Toolkit for diverse clients
- Owned application architecture, type-safe UI implementation, and API integrations, delivering clean, scalable, and high-quality solutions
- Refactored legacy codebases and introduced modern patterns, substantially improving maintainability and development velocity
- Partnered directly with stakeholders to translate sophisticated business requirements into intuitive user experiences

Software Developer

SEVEN SMARTS December 2022 – November 2023

- Engineered and enhanced the UniSight admin panel and landing page using Angular 16, TypeScript and SCSS, delivering fully responsive, accessibility-compliant interfaces
- Designed advanced user management features and optimized complex data workflows for demanding dashboard environments
- Improved cross-browser reliability and overall code quality through systematic refactoring and best-practice adoption

LANGUAGES

Armenian (Native)
Russian (Fluent)
English (Intermediate)

Education

Armenian National Polytechnic University 2009-13
Bachelor Degree in Electrical Engineering
Microsoft Armenia Innovation Center 2015-16
Programming fundamentals for beginners
Web Programming

Frontend Engineer

RoboDel | October 2022 – October 2023

- Developed core client-facing flows (landing, ordering, registration) for a robot-powered food delivery platform with Angular 16, RxJS, TypeScript and Tailwind CSS
- Built real-time interactive components with robust form handling, validation, and reactive data streams
- Contributed to architectural decisions and API integrations (Swagger/Postman), ensuring reliable performance and maintainable frontend structure

Frontend Developer

MerSoft LLC September 2017 – October 2022

- Owned development of multiple production-grade systems, including the Pigeon Delivery System dashboard (new modules from scratch) and Bonee QR Menu (full product lifecycle: admin panel, landing page, client interfaces)
- Designed reusable component architectures in Angular 2–13, enabling faster feature delivery and easier maintenance
- Mentored junior developers on Angular, code quality, debugging, and frontend best practices
- Collaborated cross-functionally to evolve products, improve UX, and maintain long-term stability across consumer-facing features
